## QA Automation Engineer

Web, API, Mobile & Desktop | Test Automation (Selenium, Playwright, Appium) | CI/CD Integration & Quality Engineering

## Skills

**Test Automation & Frameworks:** Selenium, Playwright, Appium, WinAppDriver, NUnit, TestNG, SpecFlow (BDD)

**Programming & Scripting:** C#, Java, JavaScript/TypeScript, Python (basic), SQL

**API & Backend Testing:** REST API testing (Postman, REST Assured), microservices validation, API verification

**CI/CD & Version Control:** Azure DevOps, Jenkins, GitHub Actions, GitLab CI, Git

**Testing & QA:** Functional, Regression, Smoke, Integration, End-to-End, Risk-based testing, Test strategy

**Web & Desktop:** Web applications, Desktop applications, SaaS platforms

**Tools & Technologies:** SSMS, Maven, NuGet, Docker (basic), Kubernetes (basic)

**Languages:** Dutch (B1), English (fluent), Russian (native), Hebrew (fluent)

**GitHub:** github.com/alenka134

## Profile

Senior QA Automation Engineer with over 7 years of experience designing and implementing test automation solutions for web, API, mobile, and desktop applications within SaaS, the public sector, healthcare, and industrial domains.

Experienced in designing and building test automation frameworks and integrating them into CI/CD pipelines with C#, Java, and JavaScript, with practical experience in Selenium,

Playwright, Appium, and WinAppDriver.

Experienced in CI/CD integration with Azure DevOps and Jenkins, improving test coverage, reducing execution time, and increasing release reliability. Strong background in API testing, microservices validation, and SQL-based authentication.

Focused on improving software quality, testing processes, and automation strategy within Agile environments, with stable and maintainable solutions.

## Experience

### Freelancer – Developer of educational tools

**Expat Language Labs, The Netherlands — 2024–present**

- Designed and developed: a web-based educational game with JavaScript
- Designed and implemented: Playwright-based end-to-end test automation framework
- Test coverage improved and manual testing reduced through automation
- Collaborated with stakeholders to improve product quality and usability
- Designed, developed, and deployed: a live web application: Project demo

### QA Automation Developer & Team Leader

**MES LTD, Israel — 2023–2024**

- Test coverage increased by 62% and test execution time reduced by 30%
- CI/CD integration led by Azure DevOps
- QA processes and internal documentation defined and improved
- Automation efforts coordinated and team members supported

### QA Automation Engineer

**MES LTD, Israel — 2021–2023**

- Automation frameworks built and maintained with C# and Java
- Regression testing automated and release cycles improved
- API testing and SQL-based validation performed

### QA Engineer – Manual & Automation

**MES LTD, Israel — 2017–2021**

- Manual and automated testing performed for desktop and web applications
- 98% defect detection achieved in critical medical applications
- Regression test time reduced by 50%

### *Researcher & Lab Manager*

**Technion – Israel Institute of Technology — 2010–2017**

- Experimental protocols designed and scientific results validated
- Managed laboratory activities and research processes

## *Training & Certifications*

- M.Sc. Biology & Medical Science – Technion
- Certification in Automation – Computer College
- Managing App Development – Quantic (2025)
- Playwright Automation (2024)
- Appium & WinAppDriver (2022)
